

This is a detailed wiring diagram of a vehicle's electrical system. The diagram shows the following components and their connections:

- Battery (1):** Located at the top left, with terminals labeled 'B' and 'V'.
- Alternator (2):** Located at the top right, with terminals labeled 'B' and 'V'.
- Headlights (3, 4):** Located on the left side, with terminals labeled 'B' and 'V'.
- Taillights (5, 6):** Located on the right side, with terminals labeled 'B' and 'V'.
- Horn (7):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Switch (8):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Coil (9):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (10):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (11):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (12):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (13):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (14):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (15):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (16):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (17):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (18):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (19):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (20):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (21):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (22):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (23):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (24):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (25):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (26):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (27):** Located in the center, with terminals labeled 'B' and 'V'.
- Ignition Points (28):** Located in the center, with terminals labeled 'B' and 'V'.

The diagram uses solid lines for main power connections and dashed lines for ground connections. Various components are labeled with letters like 'B', 'V', 'R', and 'S'.
